SUMMARY

Data Science Lead with 8 years of experience across Retail, Telco, Finance, and Insurance, translating between business stakeholders and technical teams. Take data platforms and ML products from kick-off to production, own the roadmap that gets them adopted, and build practical AI applications including agentic assistants and AI-assisted engineering workflows.

EXPERIENCE

Vinsmart Future - Expert, Data Science

May 2026 – Present

- Led a team of 7 to deliver:
  - C360 Feature Store: Launched v1 in 2.5 months with an initial team of 3, delivering 2,000+ features using data from 8+ Vingroup P&Ls.
  - AI signals: Age and gender prediction, household profiling, engagement scoring, and affluence/income ranking.
  - Vinhomes lead scoring: Ranked customers by likelihood of buying a home (AUC > 0.85).
- Standardized the development process using AI agent skills for scaffolding, code review, and documentation.

Blueinfo Jsc - Data Team Lead

Aug 2024 – Apr 2026

- Led a team of 3 (Analysts, Engineers, Scientists) in an Agile delivery model
- Defined project scope with partners and designed the technical solutions.
- Delivered projects:
  - Used telco data to build credit and propensity scoring models for Vietnam and Laos (Gini 52–55% and 70%, respectively).
  - Improved a financial institution's model Gini by 30–40%.
  - Led merchant lending lead generation for a logistics partner, from eligibility and targeting to loan performance analysis.
  - Prototyped Nutri, a multi-agent AI assistant for personalized meal planning.
- Built an ML platform for feature pipelines, model training, deployment, and monitoring, with automated CI/CD.

Prudential Vietnam Assurance - Senior Data Scientist

Nov 2022 – Aug 2024

- Delivered multiple predictive models driving strategic business outcomes:
  - Customer propensity models for cross-sell campaigns
  - Early churn prediction to reduce lapse rates
  - Automated claim for operational efficiency
  - Agent clustering and leadership potential prediction models
- Promoted adoption of AI/ML across departments through internal workshops and training initiatives
- Utilized SHAP, conformal prediction, and graph analysis for model explainability and advanced analytics
- Collaborated with the Data Engineering team to build a scalable data warehouse, ensuring robust data pipelines to support analytics and machine learning workflows

CIC Data Jsc - Data Scientist / Analyst

Aug 2020 – Jun 2022

- Designed and implemented lead scoring models with Gini scores of 64–70%, improving campaign targeting efficiency
- Extracted community features from telecom data using GraphFrames, DBScan, and KMeans
- Deployed optimization algorithms (Ortools) to maximize LeadGen ROI while minimizing operational costs
- Standardized operations and performance monitoring for Mortgage LeadGen services with telco partners
- Delivered ad-hoc analyses and A/B testing frameworks to guide data-informed decision-making

SIFT AG VN - Machine Learning Engineer *Oct 2018 – Jul 2020*

- Built demand and price forecasting models for fertilizer products globally and domestically, achieving MAPE < 1%
- Built end-to-end ML pipelines in Alteryx — from data processing to AutoML with Champion-Challenger model selection — for sales forecasting (DFS Group)
- Solved Market Basket Analysis and Store Clustering challenges for retail clients
- Collaborated with BI Developers to build dashboards and data storytelling from ML outputs
- Teaching assistant and curriculum designer for specialized consultant training courses

EDUCATION

Generative AI Engineer Program, Hanoi University of Science and Technology *2025 – Present*

Master of Data Science, Ho Chi Minh University of Science *Completed 2025*

Bachelor of Industrial Systems Engineering, Ho Chi Minh City University of Technology *2015 – 2019*

CORE COMPETENCIES

Technical Skills

Python • Spark • SQL • ML/DL • MLOps • LangGraph/LangChain • LLM Applications

Soft Skills

Data Strategy • Stakeholder Management • Agile/Scrum Management • Cross-functional Collaboration

Languages

English
